

- 4 09 Permafrost
- 4 08 Landslides/instability
- 4 16 Shifts in phenology (marine & coastal)
- 4 17 Geographical shift (marine & coastal)
- 4 26 Seagrass
- 4 42 Health
- 4 20 Species metabolism (marine & coastal)
- 4 25 Changes in kelp forests
- 4 14 River runoff
- 4 14. Marine & coastal
- 4 11 Glacier retreat
- 4 19 Changes in warm water corals
- 4 12 Drought frequency and intensity
 - 4 39 Human Settlements
- 4 27 Carbon flux (marine & coastal
- 4 36 Carbon flux (Terrestrial and freshwater)
- 4 36 Wildfires
- 4 47 Malnutrition
- 4 03 Changes in precipitation
 - 4 51 Economic activity
 - 4 49 Displacement and migration
 - 4 35 Ecosystem productivity (Terrestrial and freshwater)
- 4 44 Extreme heat exposure
- 4 50 Economic inequality
- 4 45 Crop yields
- 4 15 Species distribution (marine & coastal)
 - 4 41 Gender specific / gender unequal impacts
- 4 21 Species abundance (marine & coastal)
- 4 38 Coastal human systems
 - 4 23 Biodiversity effects (marine & coastal)
- 4 29 Shifts in phenology (Terrestrial and freshwater)
 - 4 30 Species abundance (Terrestrial and freshwater)
- 4 10 Sea ice retreat
- 4 05 Sea level change
 - 4 48 Conflict
- 4 33 Biome shift (Terrestrial and freshwater)
- 4 24 Ocean ecosystem productivitiy
- 4 34 Biodiversity effects (Terrestrial and freshwater)
- 4 31 Species metabolism (Terrestrial and freshwater)
- 4 06 Sea surface temperature
- 4 28 Species distribution (Terrestrial and freshwater)
- 4 32 Geographical shift (Terrestrial and freshwater)
- 4 01 Warming
- 4 18 Changes in fisheries output/catch (potential)
- 4 07 CO2 concentrattion
 - 4 04 Changes in strong precipitation
- 4 22 Biome shift (marine & coastal)
- 4 46 Food prices
 - 4 02 Extreme temperature
 - 4 13 River floods
- 4 37 Arctic infrastructure
 - 4 40 Indigenous communities
 - 4 43 Vector-borne diseases
- 4 28.0 Terrestrial and freshwater
